

PROGRAM SPECIFIC OUTCOME FOR UG DEGREE IN CHEMISRY

PROGRAM SPECIFIC NAME- B.Sc. in chemistry

- **PSO-1 : The Student will understand the existence of matter in the universe as solids, liquids and gases which are composed of molecules, atoms and subatomic particles.**
- **PSO-2: Student will learn to estimate inorganic salt mixtures and organic compound both qualitatively and quantitatively using the classical methods of analysis in practical classes.**
- **PSO-3 : Students will grasp the mechanisms of different types of reaction both organic and inorganic and will try to predict the products of unknown reactions.**
- **PSO-4: Students will learn to synthesize the chemical compounds by maneuvering the addition of reagents under optimum reaction conditions.**
